

## CRM

### Centre for Mathematical Research

**Field:**

[Sciences](#)

**Keywords:**

Complex systems, Financial mathematics, Harmonic analysis, Industrial mathematics, Mathematical biology, Numerical analysis, Scientific computing, Theory of approximation

---

#### A calling to serve the mathematical community

The CRM was founded in 1984 to foster advanced research and training in mathematics through cooperation and synergies with universities and other research organisations, with the goal of becoming an internationally recognised scientific institution.

The centre's activity has two very distinct aspects: on the one hand, it is an organiser of competitive activities in the international sphere (intensive research programmes, advanced courses, congresses) and a host centre for long-term visiting researchers collaborating with the Catalan research community; on the other hand, since 2008, the CRM has had its own research groups, which has allowed it to open new lines of research in emerging areas of application.

**Structure:**

Consortium

**Partners:**

Government of Catalonia, Institute of Catalan Studies (IEC)

**Founded:**

1984 (consortium since 2002)
